### **Weather Advisory No. 04 for Southwest Monsoon**

**Releasing Officer:**

**(SGD)**

**UNDERSECRETARY RICARDO B JALAD**

Executive Director, NDRRMC  
and Administrator, OCD

**DATE : 31 July 2020, 11:00 AM**

Source: PAGASA-DOST

#### **I. SITUATION OVERVIEW:**

The Low Pressure Area over the West Philippine Sea intensified into a Tropical Depression (TD) at 8:00 AM today. At 10:00 AM today, the center of the TD was estimated based on all available data at 850 KM west of Northern Luzon [outside PAR] (17.7°N, 112.6°E). This TD has no direct impact over the country and is moving west northwestward towards Southern China-Northern Vietnam area. However, it continues to enhance the Southwest Monsoon affecting the country.

Today through tomorrow morning, the Southwest Monsoon will bring monsoon rains over Eastern Isabela, Aurora, Zambales, Bataan, Occidental Mindoro, Oriental Mindoro and Palawan (including Calamian and Cuyo Islands). Flooding and rain-induced landslide may occur during heavy or prolonged rainfall especially in areas that are highly or very highly susceptible to these hazards. The public and local disaster risk reduction and management offices concerned are advised to monitor the rainfall/thunderstorm advisories and heavy rainfall warnings from PAGASA Regional Services Divisions and take appropriate measures.

A Gale Warning is in effect over the northern and western seaboard of Luzon. Sea travel is risky over these areas due to rough seas (2.5-4.0 m) associated with the Southwest Monsoon.

The next update on this weather disturbance will be incorporated in the Public Weather Forecast at 4:00 PM today and 4:00 AM tomorrow.

The next weather advisory will be issued at 11:00 AM tomorrow.
