National Disaster Risk Reduction and Management Center, Camp Gen. Emilio Aguinaldo, Quezon City, Philippines

## **NDRRMC ADVISORY**

**T O** : ALL CHAIRPERSONS, RDRRMC/OCDRC V, PDRRMCs

**SUBJECT** : BULUSAN VOLCANO UPDATE

**D A T E** : 26 November 2010, 08:00 AM

Source: DOST-PHIVOLCS

Bulusan Volcano's (12°46.2'N, 124°03'E) seismic network recorded a total of three (3) volcanic quakes during the 24 hour observation period. Moderate white steam plume that rose to about 150m above the NW vent was observed drifting southwest. Meanwhile, weak to moderate emission of white steam plume from the volcano's crater and other known thermal vents were also observed.

**Alert Level 1** remains in effect over Bulusan Volcano.

1. **The public is reminded not to venture inside the 4-kilometer radius Permanent Danger Zone (PDZ) because the area is at risk to sudden steam and ash explosions.**
2. **Due to the prevailing wind direction, residents located in the northwest and southwest sectors of the volcano are advised to take precautions against ashfalls.**
3. **Civil aviation authorities must also warn pilots to avoid flying close to the volcano's summit as ejected ash and volcanic fragments from sudden explosions may pose hazards to aircrafts.**
4. **Furthermore, residents near valleys and river/stream channels should be watchful against sediment-laden stream flows and lahars because ash and other loose volcanic materials may be remobilized during heavy and prolonged rainfall.**

You are hereby directed to undertake monitoring and precautionary measures in your AOR. The public and the Disaster Risk Reduction and Management Councils (DRRMCs) concerned are advised to take appropriate actions and to be on alert for any development.

Ensure the dissemination of this NDRRMC Advisory to the local DRRMCs, TV and radio stations in your AOR, for their information, reference and guidance.

Submit report on actions taken thereof.
