Movement:	Moving North Northeast slowly
Forecast Positions/Outlook:	Monday morning: 380 km East of Basco, Batanes

	<p><i>Tuesday morning:</i> <i>610 km Northeast of Basco, Batanes</i></p> <p><i>Wednesday morning:</i> <i>910 km Northeast of Basco, Batanes</i></p>
PUBLIC STORM WARNING SIGNAL	
Signal No. 1 (30-60 kph winds)	Batanes Group of Islands Calayan Islands

- Storm Warning Signal over Northern Aurora is now lowered.
- Residents in low lying and mountainous areas under Public Storm Warning Signals are alerted against possible flashfloods and landslides.
- Estimated rainfall amount is from 15 - 25 mm per hour (heavy) within the 400 km diameter of the Tropical Storm.
- TS "AMBO" is expected to enhance the Southwest Monsoon that will bring rains over Central and Southern Luzon and Visayas.
- Fishing boats and other small seacrafts are advised not to venture out into the seaboards of Southern Luzon and Visayas and the Eastern seaboard of Northern and Central Luzon due to the combined effect of TS "AMBO" and the Southwest Monsoon.

II. ACTION/S TAKEN

NDRRMC-OPCEN

- Disseminated **Severe Weather Bulletin No. 10 on Tropical Storm "AMBO"** to all OCD Regional Centers through SMS and facsimile and uploaded same at the NDRRMC website for further dissemination to their respective local disaster risk reduction and management councils (LDRRMCs) from the provincial down to the municipal levels
- Directed RDRRMCs concerned through the OCD Regional Centers to undertake precautionary measures in their area of responsibility (AOR) and subsequently advised local DRRMCs to initiate pre-emptive evacuation of families in low-lying and mountainous areas if situation warrants.
