NO PUBLIC STORM WARNING SIGNAL RAISED	

- Estimated rainfall amount is from 5 - 15 mm per hour (moderate - heavy) within the 300 km diameter of the Tropical Depression.
- Tropical Depression "LABUYO" is too far to directly affect any part of the country. However, the Low Pressure Area (LPA) is now in the vicinity of Cuyo, Palawan (11.4°N, 121.4°E) embedded along the Intertropical Convergence Zone (ITCZ) will bring rainshowers and thunderstorms over Southern Luzon, Visayas and Northern Mindanao.
- The public and the disaster coordinating councils concerned are advised to take appropriate actions.

You are hereby directed to monitor the situation and undertake precautionary measures in your area of responsibility (AOR). Likewise, the public and the Disaster Risk Reduction and Management Councils (DRRMCs) are advised to take appropriate actions.

In order to better inform/warn communities, you are reminded to disseminate these through local/community leaders and through your local media, including community radio stations. Conduct press briefings as often as needed. This local effort will complement and reinforce efforts at the national level. Emphasis should be on proactive actions – evacuation rather than rescue.

Let us untiringly aim for zero casualties.

Submit report on actions taken thereof.
