Administrator, OCD

DATE : 24 September 2016, 8:00 AM

Sources: OCDROs V, X, and NCR

1. Report on the Drying up of Water Wells in Sto. Domingo, Albay from OCDRC5

A. Situation Overview:

- Due to adverse impact prolonged drought, the Municipality of Sto. Domingo, Albay is experiencing shortage of water supply due to cases of drying of wells on the vicinity.
- Moreover, the depletion of several water wells and springs were due to the likely inflationary trend shown by the electronic tilt located along the upper slope of Mayon volcano based on the on-going evaluation.
- Sto. Domingo declared a State of Calamity on Sept. 20, 2016 to mitigate the impending effects of the situation.

B. Effects:

- Affected population as of Sept. 22, 2016:
