Coastal flooding along seashore (low-lying) areas affected by tides; accumulation/ponding of rainwater at relatively low-lying areas particularly those with poor drainage system.		Pampanga-Bulacan Delta areas; Pasac-Guagua Sub-basin	
The public and the local disaster risk reduction and management councils (LDRRMCs) concerned are advised to take appropriate actions to mitigate the adverse impacts of riverine flooding; possible flashfloods and landslides at mountainside areas (upstream section of Pampanga River Basin)			

People living near the mountain slopes and low-lying areas near the above mentioned rivers and streams are advised to be alert for possible flashfloods and landslides, and the local disaster risk reduction and management councils concerned are advised to be alert and take appropriate actions.

Let's untiringly aim for zero casualties.

Submit report on actions taken.
