Expected Basin Response

Water Level/Raingauge Station	River/Lake/Swamp Trend at Station	Flood Situation Message	Low-lying areas likely to be affected
Arayat Station, Pampanga River	Now at 7.96 m / slow recession to continue to reach below 6.0 m alarm wl by tomorrow	Flooding to persist at low-lying and riverside areas	Cabiao and Arayat, Candaba, San Luis, San Simon and Apalit
Candaba Station, Candaba Swamp	Now at 6.118 m / very slow recession in effect to reach below 6.0 m this afternoon	Flooding to persist for several days	Candaba, San Miguel (w/in swamp area), San Idefonso (w/in swamp area), San Luis, San Simon, Baliuag and San Rafael
Zaragoza Station, Rio Chico River	Still above 4.0 m (4.5 m is critical wl); slow recession to continue	Flooding to remain at low-lying riverside areas until today	La Paz, Concepcion, Zaragoza, San

	to reach below 2.5 alarm wl by thursday		Antonio and Cabiao
Sulipan Station, Pampanga River	Now at 3.51 m / very slow fluctuating recession below 3.8 m critical wl; to reach below 3.2 m alarm wl late today	Flooding to persist for several days	Macabebe, Masantol, Apalit, Calumpit, Hagonoy and Paombong
Coastal flooding along low-lying areas affected by tides and the slow descent of floodwaters from upper main Pampanga River; Remnants of ponded rainwater at relatively low-lying areas particularly those with poor drainage system.			Pampanga-Bulacan Delta areas; Pasac-Guagua Sub-basin
The public and the local disaster risk reduction and management councils (LDRRMCs) concerned are advised to take appropriate actions to mitigate the adverse impacts of riverine flooding coupled with high tides.			

People living near the mountain slopes and low-lying areas near the above mentioned rivers and streams are advised to be alert for possible flashfloods and landslides, and the local disaster risk reduction and management councils concerned are advised to be alert and take appropriate actions.

Let's untiringly aim for zero casualties.

Submit report on actions taken.
