Coastal flooding along low-lying areas affected by tides and the slow descent of floodwaters from upper main Pampanga River; Remnants of ponded rainwater at relatively low-lying areas Guagua Sub-basin particularly those with poor drainage system.

Pampanga-Bulacan Delta areas: Pasac-

The public and the local disaster risk reduction and management councils (LDRRMCs) concerned are advised to take appropriate actions to mitigate the adverse impacts of riverine flooding coupled with high tides.

People living near the mountain slopes and low-lying areas near the above mentioned rivers and streams are advised to be alert for possible flashfloods and landslides, and the local disaster risk reduction and management councils concerned are advised to be alert and take appropriate actions.

Let's untiringly aim for zero casualties.

Submit report on actions taken.
