Expected Basin Response

Water Level/Raingauge Station	River/Lake/Swamp Trend at Station	Flood Situation Message	Low-lying areas likely to be affected
Arayat Station, Pampanga River	Now at 7.25 m / slow recession to continue to reach below 6.0 m alarm WL later today	Remnants of floodwaters along Low-lying riverside areas	Cabiao and Arayat
Candaba Station, Candaba Swamp	Now at 6.01 m / very slow recession to remain above 5.0 m critical WL until Friday	Flooding to persist for several days	Candaba, San Luis, San Simon, Baliuag San Rafael, Apalit Calumpit and Pulilian
Zaragoza Station, Rio Chico River	Now at 3.95 m / slow fluctuating below 4.5 m critical WL to to reach below 2.5 alarm WL by Friday	Remnants of floodwaters along low-lying riverside areas	La Paz, Concepcion, Zaragoza, San Antonio and Cabiao
Sulipan Station,	Now at 3.37 m / very slow recession below	Flooding to persist for along low lying	Macabebe, Masantol, Apalit,

Pampanga River	3.8 m critical WL; to reach below 3.2 m alarm WL later today	riverside areas for several days	Calumpit, Hagonoy and Paombong
Coastal flooding along low-lying seashores areas affected by tides and the slow descent of floodwaters from upper main Pampanga River; Remnants of ponded rainwater at relatively low-lying areas particularly those with poor drainage system.			Pampanga-Bulacan Delta areas; Pasac-Guagua Sub-basin
The public and the local disaster risk reduction and management councils (LDRRMCs) concerned are advised to take appropriate actions to mitigate the adverse impacts of riverine flooding coupled with high tide.			

People living near the mountain slopes and low-lying areas near the above mentioned rivers and streams are advised to be alert for possible flashfloods and landslides, and the local disaster risk reduction and management councils concerned are advised to be alert and take appropriate actions.

Let's untiringly aim for zero casualties.

Submit report on actions taken.
