Candaba Station, Candaba Swamp	Now at 6.30 m/ just peaked; slow filling up of the swamp above 5.0 m critical WL until this afternoon; a very slow recession begins today	Flooding continue to persist for several days	Candaba, <b>San Miguel</b> (w/in swamp area), <b>San Ildefonso</b> (w/in swamp area), <b>San Luis</b> , <b>San Simon</b> and <b>Pulilan</b>
Zaragoza Station, Rio Chico River	Now at 4.70 m / had peaked; slow recession in	Flooding continue to persist until this	<b>Aliaga</b> , <b>Licab</b> , <b>La Paz</b> , <b>Concepcion</b> , <b>Zaragoza</b> , <b>San</b>

	<b>progress above 4.50 critical WL by noon today</b>	<b>afternoon</b>	<b>Antonio and Cabiao</b>
Sulipan Station, Pampanga River	<b>Now at 3.21 m / slow rise above 3.20 m alarm wl but to remain below 3.80 m critical wl until this afternoon</b>	<b>Flooding continue to occur for a few days</b>	Macabebe, Masantol, <b>Apalit</b> , Calumpit, Hagonoy and Paombong
Coastal flooding along seashore (low-lying) areas affected by tides; accumulation/ponding of rainwater at relatively low-lying areas particularly those with poor drainage system.			Pampanga-Bulacan Delta areas; Pasac-Guagua Sub-basin
The public and the local disaster risk reduction and management councils (LDRRMCs) concerned are advised to take appropriate actions to mitigate the adverse impacts of riverine flooding; possible flashfloods and landslides at mountainside areas (upstream section of Pampanga River Basin)			

People living near the mountain slopes and low-lying areas near the above mentioned rivers and streams are advised to be alert for possible flashfloods and landslides, and the local disaster risk reduction and management councils concerned are advised to be alert and take appropriate actions.

Let's untiringly aim for zero casualties.

Submit report on actions taken.
