Source: PAGASA-DOST Issued at 5:00 AM, 15 September 2018

AVERAGE BASIN RAINFALL:

Past 24-hrs ending at 4:00 AM today: 44 mm
 Forecast 24-hrs: 30 to 60 mm

Valid from 5:00 AM, 15 September 2018 to 5:00 PM today unless there is an intermediate Bulletin.

Expected Basin Response

Water Level/Raingauge Station	River/Lake/Swamp Trend at Station	Flood Situation Message	Low-lying areas likely to be affected
Sapang Buho Station, Pampanga River	Now at 1.30m/slow rise to continue to remain below 3.70m alert WL (Yellow) until this afternoon	Flooding is possible beginning this afternoon along riverside areas	San Leonardo, Sta. Rosa, Palayan City, Laur, Cabanatuan City and Gen. Natividad
Arayat Station, Pampanga River	Now at 4.81m/slow rise to reach 5.0m WL (yellow) alert this afternoon	Flooding is possible beginning this afternoon along riverside areas	Cabiao, Arayat, and Apalit
Candaba Station, Candaba Swamp	Now at 4.47m/slow filling-up of swamp WL above 4.50m alarm WL (orange) to reach 5.0m critical WL (red) later today	Flooding remains at low-lying areas; possible wider flooded areas beginning late today	Candaba, San Luis and San Simon
Zaragoza Station, Rio Chico River	Now at 3.40m/slow rise to continue above 2.50m alarm WL (orange); to reach 4.5m critical WL (red) later today	Flooding is threatening beginning today along riverside areas	Guimba, Licab, La Paz, Concepcion, Zaragoza and San Antonio
Sulipan Station, Pampanga River	Now at 2.54m/slow rise to reach alert WL (yellow) by noon today	Flooding is possible beginning this afternoon	Macabebe, Masantol, Apalit, Calumpit, Hagonoy and Paombong
Coastal flooding along seashore (low-lying) areas affected by tides;			Pampanga-Bulacan

accumulation/ponding of rainwater at relatively low-lying areas particularly those with poor drainage system.	Delta areas; Pasac-Guagua Sub-basin
The public and the local disaster risk reduction and management councils (LDRRMCs) concerned are advised to take appropriate actions to mitigate the adverse impacts of riverine flooding; possible flashfloods and landslides at mountainside areas (upstream section of Pampanga River Basin)	

Residents and Local Disaster Risk Reduction and Management Councils (LDRRMCS) concerned are still advised to continue to maintain precautionary measures to mitigate adverse impacts of river flooding due to the accumulation /ponding of rainwater combined with the effects with effects of high tides and including areas with poor drainage systems.

Let's untiringly aim for zero casualties.

Submit report on actions taken.
