Sulipan Station, Pampanga River	Now at 3.44 m / slow rise to peak this afternoon below 3.8 m critical wl	Flooding to persist for several days	Macabebe, Masantol, Apalit, Calumpit, Hagonoy and Paombong
Coastal flooding along seashore (low-lying) areas affected by tides; accumulation/ponding of rainwater at relatively low-lying			Pampanga-Bulacan Delta

areas particularly those with poor drainage system.

areas; Pasac-
Guagua Sub-basin

The public and the local disaster risk reduction and management councils (LDRRMCs) concerned are advised to take appropriate actions to mitigate the adverse impacts of [riverine flooding coupled with high tides](#).

People living near the mountain slopes and low-lying areas near the above mentioned rivers and streams are advised to be alert for possible flashfloods and landslides, and the local disaster risk reduction and management councils concerned are advised to be alert and take appropriate actions.

Let's untiringly aim for zero casualties.

Submit report on actions taken.
