and Allied Rivers**

Releasing Officer:

for: [Signature]
USEC RICARDO B JALAD
Executive Director, NDRRMC and
Administrator, OCD

DATE: 25 August 2018, 4:00 AM

Source: PAGASA-DOST Issued at 4:00 AM, 25 August 2018

AVERAGE BASIN RAINFALL AS OF 3:00 AM TODAY:

Past 24-hrs Observed Rainfall= **70.6 MM**

Forecast 24-hr = **Moderate to heavy rains**

BASIN EXPECTED RESPONSE			
WATER LEVEL STATION	RIVER/ SWAMP WATER LEVEL (WL) TREND AT STATION	FLOOD SITUATION MESSAGE	PARTICULAR LOW-LYING AREAS TO BE AFFECTED
Sta Maria Station/ Upper Agno River	Now at 0.15 M still below 2.25 M Alert Water Level	FLOODING IS POSSIBLE San Roque Dam Releases as of 3 AM today: Inflow = 957 CMS Outflow = 685 CMS	Asingan, Sta Maria, Rosales, Villasis
Carmen Station/Agno River	Now at 1.41 M. to reach 2.1 M Alarm water level within the next 24 hrs	FLOODING IS THREATENING San Roque Dam Releases as of 3 AM today: Inflow = 957 CMS Outflow = 685 CMS	Parts of Rosales & Villasis, Sto Tomas, Alcala, Bautista
San Vicente Station/Lower Agno River	Now at 3.22 M slow rise to reach above 3.68 N alarm water level	FLOODING IS THREATENING San Roque Dam Releases as of 3 AM today: Inflow = 957 CMS Outflow = 685 CMS	Bayambang, Urbiztondo, Mangatarem, Aguilar, Lingayen
Tibag Station/ Tarlac River (tributary)	Now at 0.56 M very slow rising but still below 2.1 M Alert water level	Flooding is possible	Tarlac City, Gerona, Paniqui, Moncada, San Manuel
Binalonan Station/Tagamusi ng River (allied)	Now at 2.76 M to reach above alarm level	Flooding to occur	Binalonan, portions of Urdaneta City, portions of Manaoag, portions

			of Sta Barbara
Sta Barbara Station/ Sinacolan River (allied)	Now at 6.17 M Gradual rise to reach above 6.90 M critical water level	Flooding to occur	Sta Barbara, Calasiao, Dagupan City, & portions of Binmaley
Mapandan Station/ Angalacan River (allied)	Now at 1.86 M slow rise to reach 2.23 M alert water level within the next 24 hrs	Flooding is possible	Mapandan, San Fabian, Mangaldan
Flooding due to poor drainage system & accumulation of rainwater still remain in the low-lying urbanized areas.			Dagupan City & Urdaneta City
Coastal flooding due to effects of tides and accumulation of rainwaters in the low-lying seashore areas			Dagupan City, Lingayen
Water level of Lower Main Agno River will continue receding until it reaches below alert level stage. Likewise, water level of allied rivers, particularly Pantal-Sinacolan Rivers are still above alert level stage but will continue to recede slowly until the next few days. Minor flooding due to accumulation of rainwaters (ponding) in the low-lying areas within the basin to subside further. With this development, unless significant rains will occur in the immediate future to adversely affect the basin. This is the Final Bulletin.			

The residents and the Local Disaster Risk Reduction and Management Councils (DRRMC's) concerned are still advised to further maintain precautionary measures to mitigate adverse impacts of river flooding combined with the effects of tide, flooding due to ponding and at areas with poor drainage systems.

ACTION/S TAKEN:

NDRRMC Advisory on **Flood Bulletin No. 01 for Agno River Basin and Allied Rivers** was disseminated to **OCD Regional Office I** through facsimile, SMS and website for further dissemination to their respective Local Disaster Risk Reduction and Management Councils (LDRRMCs) from the provincial down to the municipal levels
