Mapandan Station/Angalacan River (Allied)	Still below 2.23 M. Alert level stage		Mapandan, San Fabian, Mangaldan
Flooding due to poor drainage system & ponding of rainwater in the low-lying urbanized areas to recede slowly.			Dagupan City & Urdaneta City

PUBLIC WARNING:

Water level of main Agno River remains below alert level stage. Likewise, water level of allied Rivers was slowly receding. Minor flooding due to accumulation of rainwater in the low-lying areas within the basin is expected to subside further. With this development, unless significant rains will prevail in the immediate future to affect the basin, this is the final bulletin.

People living near mountain slopes, low-lying areas, particularly areas with poor drainage systems, coastal or high tide-affected areas, adjacent to or along the above mentioned waterways and the Local Disaster Risk Reduction Management Councils (DRRMC's) concerned are advise to be alert for possible landslides, coastal flooding, flash floods and/or river flooding

ACTION/S TAKEN:

NDRRMC Advisory on Flood Advisory No. 03 (FINAL) for Agno River Basin and Allied Rivers was disseminated to OCD Regions I and III through facsimile, SMS and website for further dissemination to their respective Local Disaster Risk Reduction and Management Councils (LDRRMCs) from the provincial down to the municipal levels.
