

## NDRRMC UPDATE

### Flood Bulletin No. **03** for Pampanga River Basin and Allied Rivers

Releasing Officer:

  
**USEC RICARDO B JALAD**  
Executive Director, NDRRMC and  
Administrator, OCD

**DATE: 08 September 2018**

Source: PAGASA-DOST Issued at 5:00 AM, 08 September 2018

#### **AVERAGE BASIN RAINFALL AS OF 4:00AM TODAY:**

Past 24-hrs observed rainfall = **30 MM**

Forecast 24-hr basin rainfall = **15 to 25 MM**

As of 4:00AM today, the stretch of main Pampanga River remained just below alarm level (Orange) status. Slow rise at the lower sections of Lower Main Pampanga River to continue.

The Southwest Moonsoon (Habagat) will bring cloudy skies with scattered rains and thunderstorms over the Allied Sub-basin of Pasac-Guagua and lower Main Pampanga River Basin (including Candaba Swamp area) during the forecast period.

<b>SUB-BASINS: RIVER CHANNELS. TRIBUTARIES, SWAMP</b>	<b>AREAS LIKELY TO BE AFFECTED</b>	<b>IMPACTS</b>
Tributary Rio Chico River	La Paz, Concepcion, Zaragoza and San Antonio	Flooding due to accumulation / ponding of rainwater particularly at low-lying river side areas/ areas w/ poor drainage systems.
Pasac – Guagua River Sub Basin: Abacan, Porac – Gumain, Pasig – Potrero Rivers	Sasmuan, Guagua, Lubao, Bacolor, Sta. Rita, Minalin, Sto. Tomas, Mexico, City of San Fernando, Macabebe, Masantol and Floridablanca	Flooding due to accumulation/ponding of rainwater particularly at low-lying areas and areas with poor drainage system combined with coastal flooding as a result of high – tide at riverside and coastal areas.

<p>Lower Main Pampanga Basin: Candaba Swamp and stretched of the Lower Pampanga River</p>	<p>Bulacan – Pampanga Delta Areas: Candaba, San Luis, San Simon, Apalit, Calumpit, Hagonoy, Paombong, Macabebe and Masantol</p>	<p>Flooding due to accumulation/ponding of rainwater particularly at low-lying areas (including the swamp area) and areas with poor drainage system combined with coastal flooding as a result of high – tide at riverside and coastal areas.</p>
---	---	---

Residents and Local Disaster Risk Reduction and Management Councils (LDRRMCS) concerned are still advised to continue to maintain precautionary measures to mitigate adverse impacts of river flooding due to the accumulation /ponding of rainwater combined with the effects with effects of high tides and including areas with poor drainage systems.
