

NDRRMC UPDATE

General Flood Advisories:

No. 02 for Agno River Basin and Allied Rivers

Releasing Officer:

for Infante delafano
USEC RICARDO B JALAD
 Executive Director, NDRRMC and
 Administrator, OCD

DATE : 31 October 2018, 7:00 AM

Source: PAGASA-DOST

PRESENT WEATHER:

At 4:00 AM today, the center of Severe Tropical Storm "ROSITA" was based on all available data at 210 km Northwest of Dagupan City, Pangasinan (17.1° N, 118.7° E) with maximum sustained winds of 110 km/h near the center and gustiness of up to 120 km/h.

AVERAGE BASIN RAINFALL:

Past 48-Hrs Observed Rainfall: 103.0 millimeters

No. 02 for Agno River Basin and Allied Rivers

FORECAST 24-HR RAINFALL	Light to moderate rains
WATERCOURSES LIKELY TO BE AFFECTED	<u>Rivers and Tributaries in:</u> <ul style="list-style-type: none"> • Upper and Middle Agno River- particularly Ambayaoan, Viray-Depalo, Banila and Totonogen • Lower Agno River - particularly Tarlac, Camiling, Bayaoas • Pantal-Sinocalan - particularly Tuboy, Ingalera, Tagamusing • Cayanga - particularly Bued-Patalan, Angalacan, Aloragat

Water level of Main Agno River is still below alert level stage. However, water levels of allied and tributary rivers with small capacity within the basin are still expected to rise gradually due to rains brought by the trough of Typhoon Rosita. People living near the mountains slopes, low-lying areas particularly areas with poor drainage systems, coastal or high tide affected areas, adjacent to or along the above-mentioned waterways and the Local Disaster Risk Reduction and Management Councils (LDRRMCs) concerned are still advised to be alert for possible landslides, coastal flooding, flashfloods, flooding due to accumulation/ponding of rainwater and/or river flooding.

ACTION/S TAKEN:

NDRRMC Advisory on General Flood Advisory was disseminated to **OCD Regional Offices I and III** through facsimile, SMS, and website for further dissemination to respective LDRRMCs from the provincial down to the municipal levels.
