NDRRMC UPDATE

SitRep No. 01 re Semana Santa 2017

Releasing Officer:

USEC. RICARDO B. JALAD
Executive Director, NDRRMC and
Administrator, OCD

DATE : 12 April 2017

Sources: DOST-PAGASA, PNP and OCDRCs I, V, CAR, ARMM

I. SITUATION OVERVIEW

Semana Santa is a significant annual observance of the majority of the Roman Catholics to go to places of worship to reflect and for some it is an opportunity for families to spend time together for a long holiday.

Semana Santa begins on Palm Sunday and continues on through Maundy Thursday, when business in the Philippines either shut down operations until Black Saturday wherein many communities observe Spanish-influence Catholic rituals such as processions, with many having been practiced with pre-Hispanic beliefs.

II. WEATHER OUTLOOK FOR SEMANA SANTA

From Monday (April 10) until Thursday (April 13), warm and dry weather conditions associated with sunny weather will be experienced over the whole archipelago, with chances of some isolated rainshowers or thunderstorms due to the ridge of high pressure area (HPA) and easterlies.

On Friday (April 14) until Sunday (April 16), Mindanao, Eastern and Central Visayas, Bicol region and the provinces of Mindoro, Marinduque, and Romblon will experience cloudy skies with light to moderate rainshowers and thunderstorms. This is due to the effect of possible formation of a tropical cyclone east of Mindanao which is estimated to enter the Philippine Area of Responsibility (PAR) by Wednesday or Thursday. Metro Manila and the rest of Luzon and of Visayas will continue to have warm and dry weather conditions with chances of some isolated rainshowers or thunderstorms.

III. CURRENT WEATHER SITUATION

As of 12 April 2017, 5:00 AM, ridge of high pressure area (HPA) extending across Luzon. Easterlies affecting the eastern sections of Visayas and Mindanao. Partly cloudy to cloudy skies with isolated rainshowers or thunderstorms will be experienced over Metro Manila and the rest of the country. Light to moderate winds blowing from the east to southeast will prevail over Luzon and coming from the east to northeast over Visayas and Mindanao. The coastal waters throughout the archipelago will be slight to moderate.
