

NDRRMC UPDATE

Weather Advisory No. 02 (Final) for Low Pressure Area

Releasing Officer:

USEC. RICARDO B. JALAD
Executive Director, NDRRMC and
Administrator, OCD

DATE : 01 September 2018, 11:00 AM

Source: PAGASA-DOS issued at 11:00 AM, 01September 2018

I. SITUATION OVERVIEW:

- The Low Pressure Area (LPA) was estimated, based on all available data, at 495km east of Juban, Sorsogon (12.4°N,128.5°E). This weather system will bring scattered light to moderate rainshowers and thunderstorms over Metro Manila, MIMAROPA, CALABARZON, and whole of Visayas.
- Northern Palawan (Calamian Islands), Antique, Occidental Mindoro and the Samar Provinces will likely experience frequent light to moderate rainshowers and thunderstorms until tonight. Residents in these areas, especially those living near river channels, in low lying areas and in mountainous areas, are advised to take appropriate action against possible flooding and landslides, coordinate with Local Disaster Risk Reduction and Management Offices and continue monitoring for updates.
- The LPA is expected to dissipate within the next 12-24 hours and become embedded in the trough of the approaching Typhoon (Jebi). With this development, this is the final advisory for this weather system.
- The next update on this weather system will be incorporated in the 24-hour Public Weather Forecast at 4:00 PM this afternoon.

II. ACTIONS TAKEN:

- NDRRM Operations Center disseminated **Weather Advisory No. 02 (Final)** to all OCD Regional Offices through SMS and facsimile and uploaded on the NDRRMC website for further dissemination to their respective local DRRMCs from the provincial down to the municipal levels.
