P-D-I-T-R STRATEGY

With reference to the National Action Plan (NAP) for COVID-19, the National Task Force is intensifying efforts to PREVENT the spread of the COVID-19, TEST individuals and communities, ISOLATE those that are identified to be confirmed cases, TREAT and provide with appropriate health care, and REINTEGRATE them back to the community.

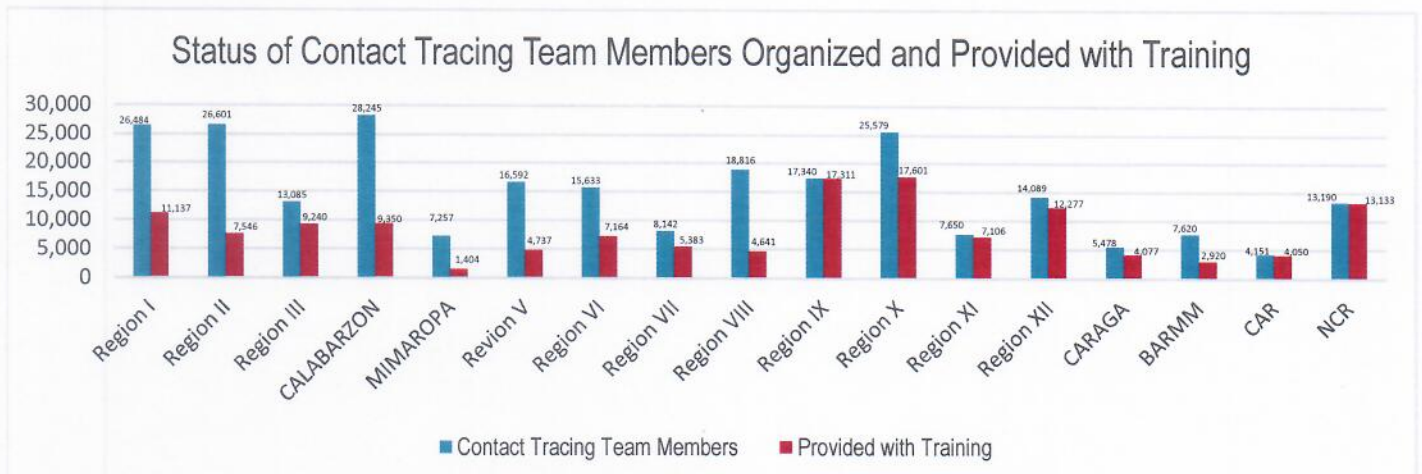

PREVENT

PREVENT enables to change mindsets and behaviors to advocate for a shared responsibility in ensuring compliance to minimum public health standards and protocols and address stigma and division in the communities, workplaces, schools. To implement the PREVENT strategy, community quarantine declarations are made in various localities, enforcing stricter regulations and disease preventive measures particular for areas with high cases. Status of community quarantine declarations is summarized as follows:

DETECT

DETECT entails active screening of those presenting with signs and symptoms of COVID-19 in the community as well as other disease surveillance activities. For this purpose, contact tracing teams have been organized and provided with appropriate training. Summary is as follows:

The overall results of contact tracing are summarized as follows:

1:5	99.50%	1,344,094
Case: Close Contacts Ratio	Contact Tracing Done for All Close Contacts of Confirmed Cases	Contacts Profiled

Also, part of DETECT strategy is the enhancement of the COVID-19 testing capacities of the country. For this purpose, testing laboratories are setup and provided with appropriate licensing. The summary is as follows:

162

Licensed RT-PCR and GeneXpert Laboratories

95

Laboratories with Ongoing Licensing Applications

The overall testing results is summarized as follows:

TESTS CONDUCTED	4,969,702	+29,878
UNIQUE INDIVIDUALS TESTED	4,680,214	+28,242
POSITIVITY RATE	9.5%	
BACKLOGS	33	

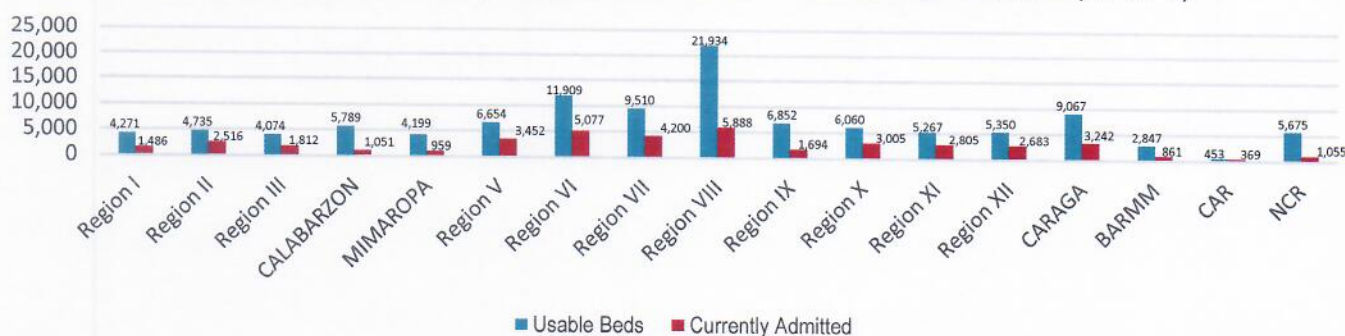

To aid in the testing efforts, Mega Swabbing Sites have been established. The outputs of the Mega Swabbing Sites are as follows:

	<i>TOTAL</i>	<i>NEW</i>
PALACIO DE MAYNILA	98,490	+1,404
MOA ARENA	102,395	+1,284
ENDERUN TENT	63,192	+2,002
PHILIPPINE SPORTS ARENA	88,232	+1,806

ISOLATE

Isolate involves implementation of measures to separate those identified as exposed and confirmed cases and provide medical interventions to further prevent the spread of the disease. This strategy involves setting up of Temporary Treatment and Monitoring Facilities (TTMFs). The summary of TTMFs established is as follows:

Status of Beds for Temporary Treatment and Monitoring Facilities (TTMFs)

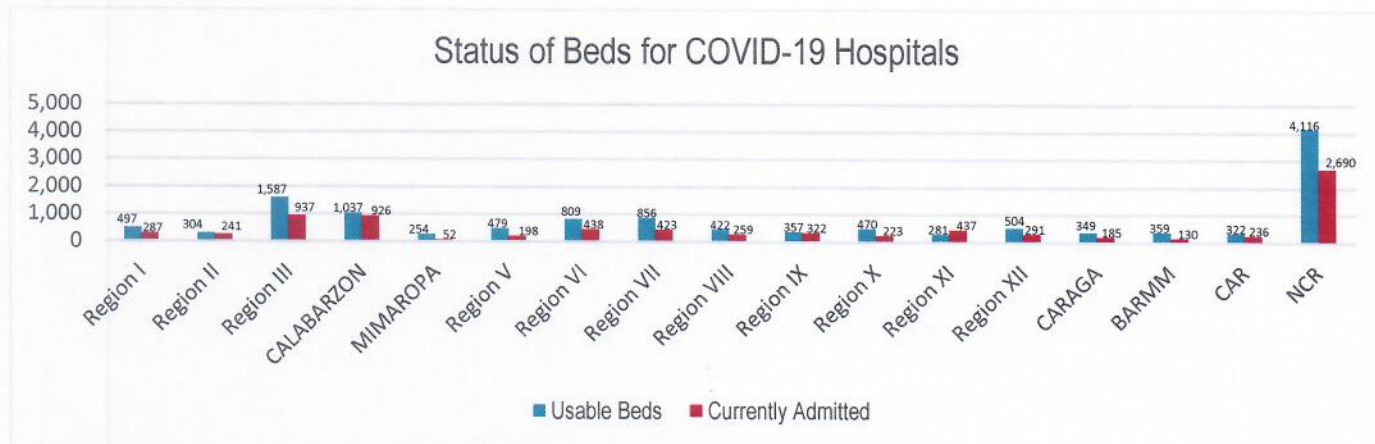

Aside from the TTMFs, Mega LIGTAS facilities have also been established. The summary of occupancies for the Mega LIGTAS facilities is as follows:

Status of Beds for Mega LIGTAS facilities

TREAT

For the TREAT strategy, One Hospital Command has been established to facilitate centralized referral system. Further, wards, isolation and intensive care units are in operation to provide treatment services for COVID-19 positives. The occupancy rate for all beds dedicated to COVID-19 (Ward, Isolation, Intensive Care) among reporting hospitals is summarized as follows.

PROCUREMENT AND DONATIONS

In terms of resources, the following is the summary of total domestic donations, international donations received by the Philippine government as well as the total procured personal protective equipment (PPE) distributed.

7,211	509	5,314,599
Total Domestic Donations	Total International Donations	Total Procured PPEs Distributed

MANAGEMENT OF RETURNING OVERSEAS FILIPINOS

Returning Overseas Filipinos are provided with assistance by facilitating their arrival from different points of origin abroad until their return to their respective homes, and attend to their medical and social needs, in order to give them comfort, ensure their safety, and prevent the spread of COVID-19. The following is the summary of ROFs

Breakdown of Active Cases

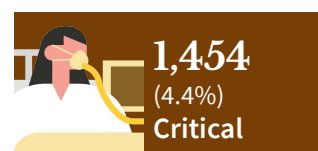

A patient with an RT-PCR confirmed case of COVID-19 without symptoms.

A patient with mild symptoms and stable vital signs. Unless the patient belongs to high-risk subgroups or has comorbidities, they are often not admitted to a treatment facility.

A patient with difficulty breathing, altered mental status, considered high-risk or in need of hospital care.

A patient with impending or ongoing respiratory failure, in need of mechanical ventilation, or with evidence of end-organ damage.

Note. A person who is classified as having a mild case of COVID-19 but is considered high-risk due to age or the presence of comorbidities must be admitted to a treatment facility. Severe or critical cases must be admitted to a treatment facility, regardless of inclusion in high-risk subgroups or presence of comorbidities.

CONFIRMED CASES BY DATE OF ONSET OF ILLNESS (NATIONWIDE)

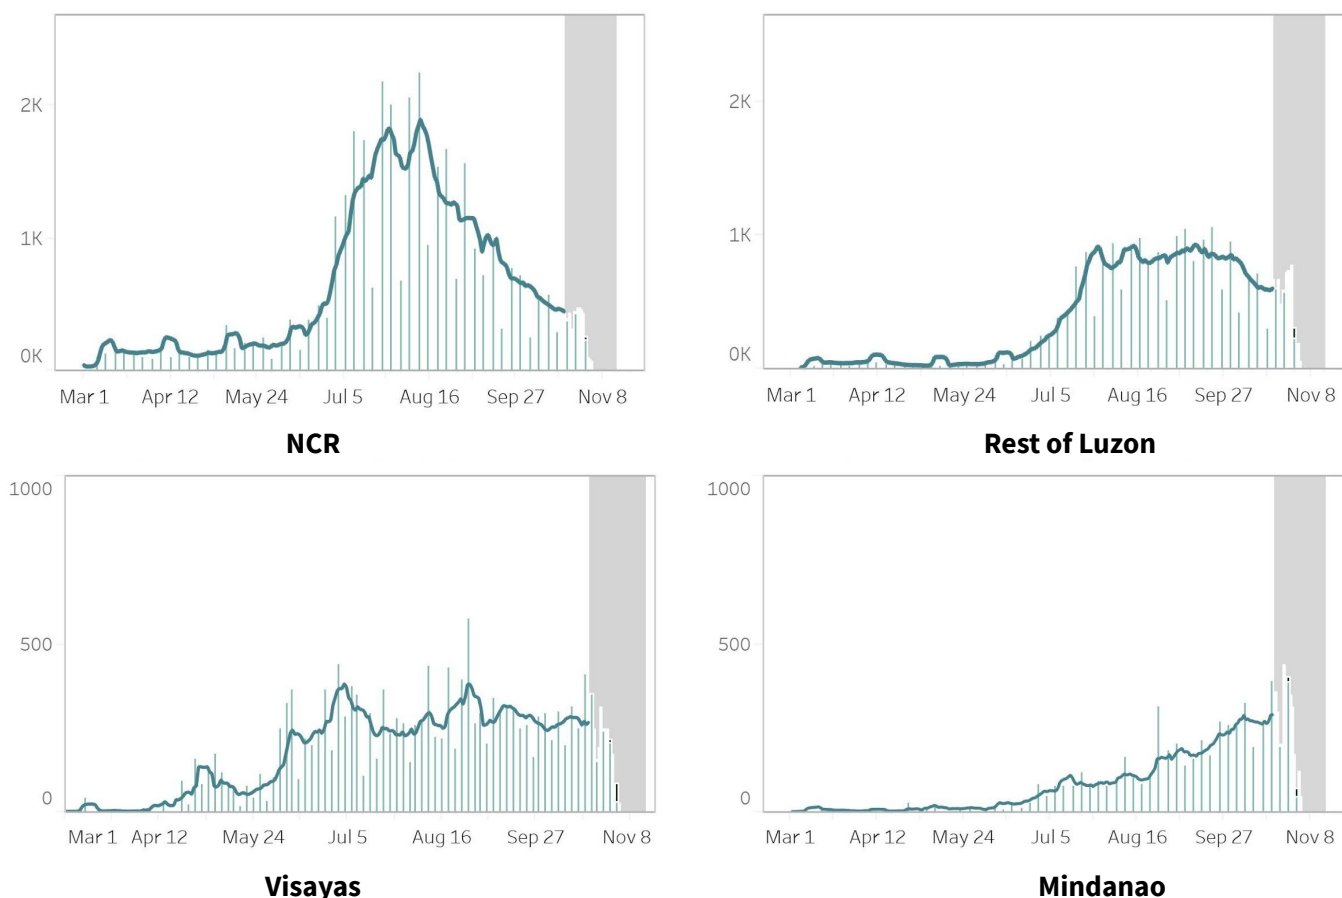

CONFIRMED DEATHS BY DATE OF DEATH (NATIONWIDE)

Notes.

1. Bars with dark green colors indicate the actual date of onset or date of death for newly-reported cases.
2. In cases where date of onset of illness is unreported, date of specimen collection was used as proxy. Cases that do not have both are not accounted for in the date of onset histogram. As of this situation report, around 10% of cases have unreported dates of specimen collection and onset of illness.
3. Owing to delays in reporting, case counts within the gray area are still incomplete. Hence, we urge caution in interpreting data beyond this 14-day cutoff. Rest assured that the DOH continues to work tirelessly to ensure the timely reporting of accurate data.

CONFIRMED CASES BY DATE OF ONSET OF ILLNESS (DISAGGREGATED)

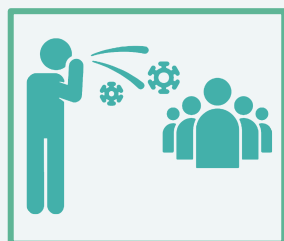

Notes.

1. Bars with dark green colors indicate the actual date of onset or date of death for newly-reported cases.
2. The cases from the "NCR" graph have been separated from cases of the "Luzon" graph.
3. Owing to delays in reporting, case counts within the gray area are still incomplete. Hence, we urge caution in interpreting data beyond this 14-day cutoff. Rest assured that the DOH continues to work tirelessly to ensure the timely reporting of accurate data.

COVID-19'S CAPACITY TO SPREAD (R_t VALUE)

October 21: 0.99 ± 0.02 October 22: 0.96 ± 0.02

Time-varying Reproduction number

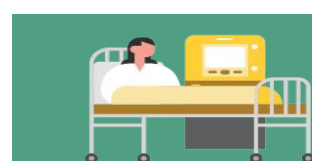

The time-varying **reproduction number (R_t)** indicates the possible number of people being infected by a sick person, at a specific time with control measures in place.

IMPORTANT NOTE. The reproduction number is measured using symptom onset, we do not include in the interpretation the past 14-16 days given the time between symptoms, health seeking, testing, and reporting. When interpreting the reproduction number keep in mind that it is a **lagging indicator (that is, it provides a snapshot of the situation two weeks ago)**. Please do not expect this number to change daily.

- The reproduction number (R_t) was around 2 early on in the outbreak. This meant that each confirmed person with COVID was infecting 2 other people.
- Based on the latest data, we are 95 percent confident that $R_t = 0.96 \pm 0.02$, which means each infected individual was infecting an average of 0.96 other persons **around two weeks ago**.
- **Lowering this value is made possible through efforts such as social distancing, wearing of PPE, and other means to stop the spread of the virus.**
- The goal is for R_t to be less than 1, which would mean that, on average, an infected person is infecting less than one person, eventually stopping the transmission of COVID-19.

UTILIZATION OF COVID-19 BEDS

39%

8,464 beds occupied out of 21,806 as of 5 November 2020

44%

822 ICU beds occupied out of 1,889

33%

1,955 ward beds occupied out of 6,020

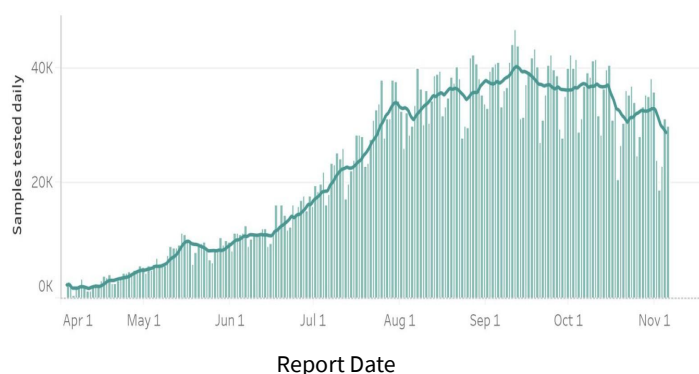

41%

5,687 isolation beds occupied out of 13,897

Note. The number of confirmed severe and critical cases may not necessarily correspond to occupancy of ICU beds and mechanical ventilators as suspect and probable cases in severe or critical condition also utilize these resources. Facilities which did not submit a daily utilization report have their most recent carry over to today.

DAILY TESTING STATISTICS (Data for November 5 as reported as of November 6, 6 PM)

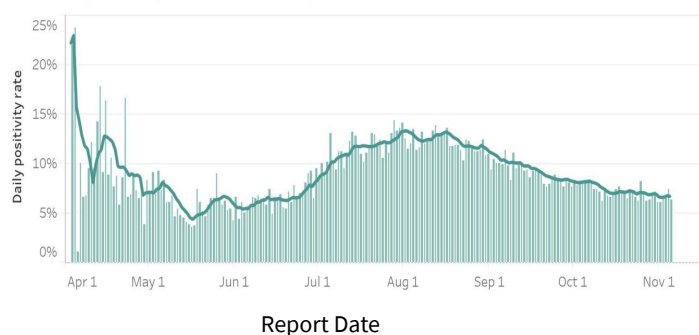

Daily Testing Output (Nationwide)

Testing Output (November 5)

Cumulative Testing Output

Samples tested	4,969,702
Individuals Tested	4,680,214
Positive Tests	445,491
Positivity Rate	9.5%

Notes.

1. The DOH is continuously validating the number of positive individuals as reported by the laboratories. When necessary, they are deduplicated. As such, the discrepancy with the number of confirmed cases does not necessarily reflect backlogs in case validation.
2. Please visit www.doh.gov.ph/covid19tracker for details regarding the testing output per laboratory.
3. A 6 PM cut-off for the situation report is used, and so the numbers presented here are not yet final. A few laboratories submit data between 6 PM and the time the public data drop is generated.

RECENT UPDATES ON COVID-19

As of November 5, 2020

- DOH recorded **32,773 active cases** with the majority of the patients exhibiting **mild symptoms** (27,199; 83.0%) while **1,454 patients** are in **critical condition** (4.4%).
- DOH recorded **11,346 health care workers** positive for COVID-19. Of these, **11,002** (97.0%) have recovered, 71 (0.6%) have died and 273 (2.4%) were active cases. Of these active cases, 132 (48.4%) were mild cases, 107 (39.2%) were asymptomatic, 23 (8.4%) in severe condition and 11 (4.0%) in critical condition.
- A total of **556,762 Returning Overseas Filipinos (ROFs)** have arrived in the country (Land-based: 313,669; Sea-based: 241,507; and Transferees from Sabah 1,586). Of these, **552,866 were released from facility quarantine** (Land-based: 311,516; Sea-based: 239,764; and Sabah: 1,586). Among the ROFs, **9,639 were confirmed COVID-19 patients** (Land-based: 6,049; Sea-based: 3,590). Among these, 262 are currently admitted, **9,347 have already recovered**; and 5 have died.
