

## NDRRMC UPDATE

### Severe Weather Bulletin No. 11 for Typhoon "AMBO"

Releasing Officer:

  
**UNDERSECRETARY RICARDO B JALAD**  
Executive Director, NDRRMC  
and Administrator, OCD

**DATE : 14 May 2020, 5:00 AM**

Source: DOST-PAGASA

### "AMBO" FURTHER INTENSIFIES AND IS MOVING CLOSER TO NORTHERN SAMAR.

#### Heavy Rainfall Outlook:

- **Today (14 May): Heavy to intense with at times torrential rains** over **Samar Provinces**. **Moderate to heavy with at times intense rains** over Sorsogon, Albay, Catanduanes, Masbate, and the rest of Eastern Visayas.
- **Tomorrow (15 May): Heavy to intense with at times torrential rains** over Bicol Region. **Moderate to heavy with at times intense rains** over Northern Samar. **Quezon**, Aurora, Marinduque, and Romblon.
- Residents in these areas are advised to take appropriate measures, coordinate with local disaster risk reduction and management offices, and continue monitoring for updates, especially the local rainfall or thunderstorm advisories and heavy rainfall warnings from PAGASA Regional Services Divisions (PRSD). **Flooding and rain-induced landslides may occur in highly to very highly susceptible areas during heavy or prolonged rainfall.**

#### Coastal Water Conditions and Storm Surge Information:

- **In the next 48 hours, storm surge of 1.0 to 3.0 meters may be experienced over the coastal areas of Northern Samar, Eastern Samar (east coast), Samar (west coast), Sorsogon, Albay, Catanduanes, Camarines Sur, Camarines Norte, Quezon, and Aurora. Along with large swells, this storm surge may cause potentially life-threatening coastal inundation.**
- **Sea travel is risky for all types of seacrafts over the seaboard areas under TCWS.**

## Landfall information:

- The typhoon is forecast to make landfall over the northeastern portion of Northern Samar this afternoon or early evening before heading towards Sorsogon later tonight. Violent winds and heavy to torrential rains of the eyewall region may begin affecting Northern Samar and the northern portions of Samar and Eastern Samar within 12 hours.
- Further intensification remains likely before the typhoon makes landfall.

Location of eye/center:	At <b>4:00 AM</b> today, the center of Typhoon “AMBO” was located based on all available data <b>including those from Guiuan Doppler Radar at 230 km East of Catarman, Northern Samar (12.1°N, 126.7°E).</b>			
Strength:	Maximum sustained winds of <b>150 km/h</b> near the center and gustiness of up to <b>185 km/h.</b>			
Movement:	Moving <b>West at 15 km/h.</b>			
Forecast Positions:	<ul style="list-style-type: none"><li>• <b>24 Hour (Tomorrow morning): In the vicinity of Guinobatan, Albay (13.2°N, 123.6°E)</b></li><li>• <b>48 Hour (Saturday morning): In the vicinity of Carranglan, Nueva Ecija (16.1°N, 121°E)</b></li><li>• <b>72 Hour (Sunday morning): 30 km West of Calayan, Cagayan (19.3°N, 121.2°E)</b></li><li>• <b>96 Hour (Monday morning): 485 km Northeast of Basco, Batanes (23.4°N, 125.4°E)</b></li><li>• <b>120 Hour Tuesday morning): 1,815 km Northeast of Extreme Northern Luzon (OUTSIDE PAR) (30.0°N, 136.6°E)</b></li></ul>
