NDRRMC UPDATE

Bulusan Volcano Advisory

Releasing Officer:

UNDERSECRETARY RICARDO B JALAD
Executive Director, NDRRMC and
Administrator, OCD

DATE : 05 July 2020, 2:00 AM

Source: DOST-PHIVOLCS

I. SITUATION OVERVIEW

ALERT STATUS OF BULUSAN VOLCANO

This is to notify all concerned authorities and the public on recent activity at Bulusan Volcano. In the last 24-hour observation period, the **Bulusan Volcano Network recorded five (5) volcanic earthquakes**. In view of the possibility of sudden steam driven or phreatic explosion from the summit crater or from vents on the Bulusan upper slopes, DOST-PHIVOLCS strongly reminds the public and local government units that the 4-kilometer radius Permanent Danger Zone (PDZ) should be avoided at all times as a precaution. In particular, all treks to the summit must be avoided due to the increased risk of phreatic activity.

DOST-PHIVOLCS is keeping close watch and evaluating the status of the volcano and will inform all concerned of any further developments.

II. ACTIONS TAKEN

1. NDRRM Operations Center prepared NDRRMC Advisory and Update, and disseminated the same to **OCD Regional Center V** through NDRRMC website in order to closely monitor the situation and take appropriate actions for any new development.
2. Concerned NDRRMC member-agencies were provided with a copy of the Memorandum for the SND.
3. DOST-PHIVOLCS is closely monitoring the activities of Bulusan Volcano and any new development will be relayed to all concerned.
