

NDRRMC UPDATE

Severe Weather Bulletin No. 05 for Tropical Storm “ENTENG” (I.N. JANGMI)

Releasing Officer:

(SGD.)

UNDERSECRETARY RICARDO B JALAD
Executive Director, NDRRMC
and Administrator, OCD

DATE : 09 August 2020, 11:00 AM

Source: DOST-PAGASA

"ENTENG" SLIGHTLY INTENSIFIES AND ACCELERATES WHILE MOVING NORTHWARD TOWARDS SOUTHERN RYUKYU ISLANDS.

Track and intensity outlook:

- ENTENG will track generally northward throughout the forecast period and will remain far from the Philippine landmass. It is forecast to move near or over the southern islands of the Ryukyu archipelago and exit the PAR this afternoon.
- Slight intensification remains likely but ENTENG is forecast to remain as a tropical storm throughout the forecast period.

Hazards affecting land:

- No Tropical Cyclone Wind Signal is currently in effect. However, gusty conditions associated with the Southwest Monsoon may be experienced (especially in coastal and mountainous areas) in the next 24 hours over Pangasinan, Benguet, Nueva Vizcaya, Quirino, Central Luzon, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, and Western Visayas.
- Today, the Southwest Monsoon enhanced by ENTENG and the Low Pressure Area (LPA) west of Zambales, Bataan, Pampanga, Tarlac, and MIMAROPA and occasional rains over Metro Manila, Aklan, Antique, and the rest of Luzon.
- Flooding and rain-induced landslides may occur during heavy or prolonged rainfall especially in areas that are highly or very highly susceptible to these hazards. The public and local disaster risk reduction and management offices concerned are advised to monitor the Rainfall/Thunderstorm Advisories and Heavy Rainfall Warnings from PAGASA Regional Services Divisions and take appropriate measures.

Hazards affecting coastal waters:

- Gale warning is in effect over the seaboard of Pangasinan, Zambales, Bataan, western coasts of Batangas, western coast of Occidental Mindoro including Lubang Island, and western coast of Palawan including Calamian Islands (2.8

to 4.0 m); Batanes, Cagayan including Babuyan Islands, and Isabela (2.8 to 3.4 m). Sea travel is risky over these areas due to rough to very rough seas.

- Those with small seacrafts are advised to take precautionary measures while venturing out over the seaboard of Visayas and the rest of Luzon due to moderate to rough seas (1.2 to 2.8).

Other weather disturbance being monitored:

- At **10:00 AM** Today, a Low Pressure Area (LPA) was estimated based on all available data at **210 km West of Iba, Zambales (15.4°N, 118.0°E)**. This disturbance remains less likely to develop into a tropical depression in the next 24 hours.

Location of eye/center:	At 10:00 AM today, the center of Tropical Storm “ENTENG” was estimated based on all available data at 540 km Northeast of Basco, Batanes (23.4°N, 126.1°E) .
Strength:	Maximum sustained winds of 75 km/h near the center and gustiness of up to 90 km/h .
Movement:	Moving Northward at 45 km/h .
Forecast Positions:	<ul style="list-style-type: none"> • 24 Hour (Tomorrow morning): 1,440 km North Northeast of Basco, Batanes (OUTSIDE PAR) (32.6°N, 126.9°E)
NO TROPICAL CYCLONE WIND SIGNAL	
The public and the disaster risk reduction and management council concerned are advised to take appropriate actions and watch for the next update to be incorporated in the 4:00 PM Public Weather Forecast and in the next Severe Weather Bulletin to be issued at 11:00 PM today or earlier .	

ACTIONS TAKEN:

NDRRM Operations Center cascaded **Severe Weather Bulletin No. 05** for **Tropical Storm “ENTENG”** to all OCD Regional Offices concerned through SMS and email and uploaded in the NDRRMC website for further dissemination to their respective local DRRMCs from the provincial down to the municipal levels.
