TCWS elsewhere were lifted.

16 September 2018

- Typhoon "OMPONG" maintained its strength as it continued to move generally west northwestward towards Southern China. All TCWS were lifted.

B. TROPICAL ANALYSIS

Typhoon “OMPONG” is the 15th tropical cyclone (TC) to enter PAR and the 3rd TC for the month of September.

“OMPONG” developed from Low Pressure Area while still over the Marshall Islands in the evening of 07 September 2018. Twelve (12) hours later, the system reached Tropical Storm (TS) intensity just northwest of Bikini Atoll in the Marshall Islands.

“OMPONG” maintained a steady westward pace due to the steering influence of the ridge of high pressure situated to the north of the system.

At 2:00 AM, 09 September 2018, it intensified into a Severe Tropical Storm (STS) while traversing the area of ocean to the north of the Micronesian state of Pohnpei. It continued to move westward threatening the Northern Mariana Islands. Then, at 2:00 PM on the same day, “OMPONG” had reached Typhoon (TY) intensity.

The typhoon continued moving generally westward while gradually increasing in intensity. “OMPONG” left the Marianas and continued moving westward threatening the Philippines. At 8:00 PM, 11 September, the typhoon reached its peak intensity of 205 km/h.

While inside the PAR, OMPONG started its gradual transition from westward to a more west-northwestward movement as it skirts the periphery of the weaker portion of the ridge of high-pressure.

Interaction with the rugged terrain of Northern Luzon after landfall caused the typhoon to weaken significantly after traversing Luzon. The typhoon continued northwestward towards southern China where it made landfall in China’s Guandong Province in the area west of Macau and Hong Kong.

The typhoon caused widespread damage across Northern and Central Luzon due to its intense nature and large size (~ 900 km). Interaction with the rugged terrain of Northern Luzon have aggravated the nature of rainfall, which caused flooding and landslides especially in the mountainous Cordillera Administrative Region (CAR)
