**NDRRMC UPDATE**  
**ONSET OF THE RAINY SEASON**

**Releasing Officer:**

*for* *g-r-t*  
**UNDERSECRETARY RICARDO B JALAD**  
Executive Director, NDRRMC  
and Administrator, OCD

**DATE : 08 June 2020**

Source: PAGASA-DOST issued on 04 June 2021

The passage of Tropical Storm "DANTE" and the occurrence of widespread rainfall monitored by PAGASA in the last five days for areas under Type I climate confirm the onset of the rainy season. Intermittent rains, associated with the Southwest (SW) monsoon will continue to affect Metro Manila and the western section of the country.

The probability of near to above normal rainfall conditions is high in the next two months (June-July). However, breaks in rainfall events (also known as monsoon breaks), which can last for several days or weeks, may still occur.

**I. ACTIONS TAKEN:**

PAGASA will continue to closely monitor the situation and updates/advisories shall be issued as appropriate. The public and all concerned agencies are advised to take precautionary measures against the impacts of the rainy season.

NDRRM Operations Center disseminated this advisory to all OCD Regional Offices through SMS and facsimile and uploaded on the NDRRMC website for further dissemination to their respective local DRRMCs from the provincial down to the municipal levels.
