Effects of Oil Spill in MIMAROPA and Region VI (Western Visayas)

SitRep No. 15 for the Effects of Oil Spill in MIMAROPA and Region VI

March 18, 2023 08:00 am

On 28 February 2023, 4:16 AM, MT Princess Empress was reported half submerged at vicinity waters off Naujan, Oriental Mindoro with 20 men onboard and loaded with 800,000 liters of Industrial Fuel Oil. At 4:20 AM, the stranded crews were rescued by MV EFES, a foreign vessel, and have been reported to be in good physical condition.

On 01 March 2023, MT Princess Empress was declared totally submerged by the PCG Team upon negative sightings of the said vessel during a seaborne and aerial search.

The Search and Rescue Team of Coast Guard Sub Station Calapan together with Special Operations Unit (SOU) Oriental Mindoro and Marine Environmental Protection Unit (MEPU) proceeded to the area of the incident to locate the submerged vessel. However, the operation was unsuccessful due to inclement weather conditions.

Further, Coast Guard Station Oriental Mindoro coordinated with the owner of the submerged vessel for the actions to be undertaken regarding the incident. An aerial inspection was also conducted around the vicinity of the incident. Upon the conduct of the said inspection, a visible oil sheen in the vicinity waters of Oriental Mindoro was sighted in the area.

On 05 March 2023, oil slick sightings were reported to have reached the Islands of Quiniluban and Agutaya in the Municipality of Agutaya, Palawan.

On 06 March 2023, BRP Hydrographer Ventura may have detected the possible site where the submerged MT Princess Empress is located. The site is about 1,200 feet or approximately 400 meters below sea level. It is located about Northeast of Pola, Oriental Mindoro but it is believed to have moved Southeast from its last known position where it completely submerged. However, this will require verification through the deployment of a remotely-operated vehicle (ROV) for the complete visualization.

The RDRRMC MIMAROPA and VI conducted oil containment and collected oil waste on the shores in the following affected areas:

MIMAROPA

A total of 6,603 liters of oily water mixture (offshore operations) were collected, 1,276 sacks of oil contaminated debris, and a total of 113 drums of waste were collected during shoreline clean-up activities.

REGION VI

1. Sitio Liwagao, Barangay. Sibolo, Liwagao Island, Caluya, Antique - An estimated of 2 KM length of coastline with estimated 8,000 liters or more of oily waste on the shores, collected 600 liters of oily water, and 20 drums sand/debris contaminated (oily waste collected).
2. Sitio Sabang, Barangay. Tinogbog, Semirara Island, Caluya, Antique - An estimated 4 KM length of coastline with estimated 8,000 liters or more of oily waste on the shores and collected 2,500 liters of oily water collected while 518 sacks of sea grass (oily waste collected) and 8 (1 tonner-bags) of garbage contaminated with oil (oily waste collected)
3. Barangay. Semirara, Semirara Island, Caluya, Antique -An estimated 2 KM length of coastline with estimated 8,000 liters or more of oily waste on the shores and collected 400 liters and 444 sack of oily waste.

RELATED INCIDENTS

The following incidents were reported in some areas of MIMAROPA, Region 6.
