Effects of Oil Spill in CALABARZON, MIMAROPA, and Region VI

SitRep No. 21 for the Effects of Oil Spill in CALABARZON, MIMAROPA, and Region VI

March 24, 2023 08:00 am

On 28 February 2023, 4:16 AM, MT Princess Empress was reported half submerged at vicinity waters off Naujan, Oriental Mindoro with 20 men onboard and loaded with 800,000 liters of Industrial Fuel Oil. At 4:20 AM, the stranded crews were rescued by MV EFES, a foreign vessel, and have been reported to be in good physical condition.

On 01 March 2023, MT Princess Empress was declared totally submerged by the PCG Team upon negative sightings of the said vessel during a seaborne and aerial search.

The Search and Rescue Team of Coast Guard Sub Station Calapan together with Special Operations Unit (SOU) Oriental Mindoro and Marine Environmental Protection Unit (MEPU) proceeded to the area of the incident to locate the submerged vessel. However, the operation was unsuccessful due to inclement weather conditions.

Further, Coast Guard Station Oriental Mindoro coordinated with the owner of the submerged vessel for the actions to be undertaken regarding the incident. An aerial inspection was also conducted around the vicinity of the incident. Upon the conduct of the said inspection, a visible oil sheen in the vicinity waters of Oriental Mindoro was sighted in the area.

On 05 March 2023, oil slick sightings were reported to have reached the Islands of Quiniluban and Agutaya in the Municipality of Agutaya, Palawan.

On 06 March 2023, BRP Hydrographer Ventura may have detected the possible site where the submerged MT Princess Empress is located. The site is about 1,200 feet or approximately 400 meters below sea level. It is located about Northeast of Pola, Oriental Mindoro but it is believed to have moved Southeast from its last known position where it completely submerged. However, this will require verification through the deployment of a remotely-operated vehicle (ROV) for the complete visualization.

On 20 March 2023, Japanese salvage vessel 'Shin Nichi Maru' carrying the Remotely-Operated Vehicle (ROV) arrived at the port of Calapan, Oriental Mindoro and deployed the ROV. Oil slick have been observed in the vicinity waters of Barangays San Agapito and San Agustin Verde Island, Batangas City.

On 21 March 2023, the ROV located the sunken MT Princess Empress and conducted assessment for possible damages.

The RDRRMC MIMAROPA and VI conducted oil containment and collected oil waste on the shores in the following affected areas:

MIMAROPA

A total of 6,803 liters of oily water mixture (offshore operations) were collected, 2,737 sacks of oil contaminated debris, and a total of 174.5 drums of waste were collected during shoreline clean-up activities.

REGION VI

1. Sitio Liwagao, Brgy. Sibolo, Liwagao Island, Caluya, Antique
 - 2 KM estimated length of affected coastline
 - 8,000 liters or more of estimated volume of oily waste landed on the shores
 - 600 liters of oily water collected
 - 272 drums sand/debris contaminated (oily waste collected)
2. Sitio Sabang, Brgy. Tinogbog, Semirara Island, Caluya, Antique
 - 4 KM estimated length of affected coastline
 - 8,000 liters or more of estimated volume of oily waste landed on the shores
 - 2,500 liters of oily water collected

- 1,072 sacks of sea grass (oily waste collected)
 - 57 - (1) tonner bags of garbage contaminated with oil (oily waste collected)
 - 33 - (1) tonner bags of contaminated sand
 - 109 - drums of contaminated sand
 - 142 - pails of contaminated sand
3. Brgy. Semirara, Semirara Island, Caluya, Antique
- 2 KM estimated length of affected coastline
 - 400 liters or more of estimated volume of oily waste landed on the shores
 - 396 - sacks of garbage/debris
