SUBJECT : PREPAREDNESS FOR THE ONSET OF LA NIÑA 2024

Source: DOST-PAGASA

El Niño in the tropical Pacific Ocean continues to weaken but impacts such as hotter and drier conditions still persist. A transition to ENSO-neutral conditions is anticipated during the April-May-June (AMJ) to May-June-July (MJJ) 2024 season. However, a likelihood for La Niña to develop during the June-July-August (JJA) 2024 season has a 60% chance.

With these conditions, the PAGASA ENSO Alert and Warning System still remains at El Niño Advisory / La Niña Watch. PAGASA will continue to monitor the weather and climate situation of the country. The public and all concerned agencies are advised to take precautionary measures against the possible impacts of the rainy season.

Further, all concerned government agencies and the public are advised to take the following preparedness measures:
