

MEMORANDUM
No. 300, s 2024

23 DEC 2024

To : All NDRRMC Member-Agencies

Subject : Deactivation of the NDRRMC Inter-Agency Coordinating Cell on 24 December 2024

The NDRRMC Inter-Agency Coordinating Cell (IACC) was activated to support operational coordination for preparedness and response and informed decision-making at the strategic level for the Kanlaon Volcano Eruption Operations.

On 09 December 2024, the IACC consolidated the humanitarian needs arising from the effects of the Kanlaon Volcano Eruption with reference to the rapid needs assessment conducted by the regions. On the same day, NDRRMC Memo No. 304 was amended to reorganize the composition of the Regional Task Force (RTF) / IACC Kanlaon to ensure the effective coordination and response.

With the RTF / IACC Kanlaon established, coordination and response at the regional level is now effectively running. The RTF / IACC, under the leadership of OCD Regional Office VI, will assume full responsibility for coordinating with its regional Response Cluster and to apprise the NDRRMOC on any immediate needs.

In this connection the NDRRMC IACC will be deactivated on 24 December 2024. However, the National Disaster Risk Reduction and Management Operations Center will still remain in BLUE Alert for the heightened monitoring of the said event.

For guidance and compliance.

For the Executive Director, NDRRMC:

CESAR M. DIAO, CESO V
Officer-in-Charge
Office of the Civil Defense Deputy Administrator for Operations
