Sugod		Maritime Incident	23 October 2024	12:30 am	On 23 October 2024, a vessel grounding incident involving LCT ASC Big Boy owned by Asian Shipping Corporation was seen off the waters of Brgy. Sugod, San Agustin, Romblon in the morning. It was carrying 154 containers, seven (7) rolling cargoes and a pre loader truck. It had 20,000 liters of diesel fuel oil on board. The anchor vessel's chain broke amidst moderate to rough sea conditions, causing it to run aground on a sandy and rocky bottom, around 50 meters from the shoreline of Brgy. Sugod. The vessel attempted to maneuver from the aground position. However, strong winds and waves prevented them from doing this. The Chief Engineer also found out a hole at the port fuel tank at the engine room approximate diameters measuring 23.62 inches which caused diesel oil to leak from the vessel and that the center rudder has malfunctioned.	The crew of the vessel transferred about 4,000 liters of diesel oil from the port tank to the starboard tank. Futher, the CGS Romblon personnel directed the MEP ERU Romblon respond to the said leak of diesel oil from the vessel. CGS Romblon coordinated with the port captain of the Asian Shipping Corporation and the PCG was informed that their tugboat will depart from the port of Cebu once the voyage of the vessels are resumed. The MEP ERU Romblon personnel have placed the absorbent boom at the engine room where the hole is located to prevent further leakage of diesel oil. CGSS San Agustin personnel are also on board to assist the crew of the vessel for additional response efforts for the vessel.	All seventeen (17) crew members, including the master, were unharmed, and no injuries were reported.
