Nag-iba I		Roads		culvert	1		0		2,000,000	The existing culvert sustained structural damage attributed to repeated overloading from heavy equipment traffic, resulting in deformation and joint displacement. The condition was further aggravated by recent flooding, which caused scouring at the inlet and outlet, leading to partial collapse and obstruction of flow.
Maidlang		Bridges		timber footbridge	1		0		5,000,000	The existing timber footbridge was severely damaged by flooding, resulting in structural deterioration and compromised safety. Due to its poor condition and vulnerability to future flood events, it is recommended to replace the timber structure with a more durable reinforced concrete footbridge to ensure long-term resilience and safety
